

Ball valves Type GBC

Maximum flow in open position – maximum tightness in closed position

Ball valves are manually operated shut-off valves suitable for bi-directional flow. The design is based on years of experience. As a leading manufacturer of a full program of refrigeration components and systems, Danfoss is able to transfer this knowledge from one product to another.

The valve concept includes a high precision laser welding ensuring both a strong and a light slimline valve body design. Both the design, weld, and choice of the sealing material enables the ball valves to meet the most demanding requirements, e.g. high working pressure, when operating with R410A.

GBC: excellent mounting and service

GBC ball valves are manually operated shut-off valves suitable for bi-directional flow. Ball valves are used in liquid, suction and hot gas lines in refrigeration, freezing and air conditioning systems. The GBC bi-directional ball valves can be delivered with or without external access port. The valves have one-piece wire seal cap to prevent unintentional cap removal or tampering between services.

Features

Applications	Advantages	Facts
<ul style="list-style-type: none"> GBC valves are used in liquid, suction and hot gas lines in all refrigeration and air-conditioning systems with fluorinated refrigerants. 	<ul style="list-style-type: none"> Full flow with minimum pressure drop. Bi-directional flow, i.e. valve orientation is unimportant. Slimline design ensures easy operational handling. Burst proof spindle design prevents liquid from being trapped internally. Valve seat of special teflon to secure maximum tightness and a long life-time. The available access port saves money if service of the system is necessary. 	<ul style="list-style-type: none"> GBC can be used for all fluorinated refrigerants (CFC, HCFC and HFC). Temperature range: -40 to +150°C Max. working pressure (PS/MWP) 45 bar (650 psig). Test pressure: 65 bar (940 psig). Approvals: UL, CSA and CE.

²⁾ Code numbers in bold are normally on stock and a shorter delivery time can, therefore, be expected.

Quality in everything we do

GBC ball valves are part of the Danfoss line components program which covers a wide range of components used in refrigeration systems. Our production utilises state-of-the-art technology and every product is thoroughly tested in accordance with the most demanding standards.

If the component you are looking for is not mentioned in this leaflet or if you have special requirements, Danfoss partner wholesalers or our local Danfoss team can offer you help and guidance and will do their utmost to fulfill your needs.
