

#BFT850DR BLACKMAX[®] RATCHET OR DRILL POWERED FLARING TOOL

- For flaring soft copper and aluminum tube 3/16" to 3/4"
- Innovative ratchet handle reduces manual flaring time
- Use with a cordless drill to dramatically reduce flaring time
- Slide gauge and sight gauge for consistent, precise flares
- Aluminum body is 50% lighter than steel designs
- Redesigned, stronger collar for longer tool life
- Eccentric hardened steel cone forms precise 45° flared ends
- Built-in clutch prevents over-compression
- Compact, professional, patented design

Use with or without cordless drill

Sliding depth gauge

Laser etched sight gauge verifies proper flare

#BFTXR BLACKMAX[®] RATCHET HANDLE ACCESSORY

- Innovative design dramatically reduces manual flaring time
- Knurled forward/reverse thumbwheel selector
- Included with BLACKMAX BFT850DR
- Can also be used with the BLACKMAX BFT850D

Ratchet handle with forward and reverse

#BFS300QC BLACKMAX® FLARING AND SWAGING TOOL

- For flaring 3/16" ~ 3/4" soft copper and aluminum tube
- For swaging 1/4" ~ 3/4" tube
- 7 quick change positions for flaring, 6 for swaging
- Quick release collar for fast flare or swage changes
- Aluminum body is 50% lighter than steel designs
- Hardened, 12 sided cone forms precise 45 flared ends
- Compact, professional patented design

Quick change flaring and swaging heads

12 sided flaring cone

Swaging head

#BTC350 BLACKMAX® MEDIUM LARGE TUBE CUTTER

- For soft or hard copper and aluminum tube
- 1/8 ~ 1-5/8 O.D.
- Patented SetNCut™ technology for faster, precise cuts
- Lightweight cast aluminum body
- Quick release pin for fast cutting wheel replacement
- Hardened, nickel plated cutting wheel
