How to use E-solution Manual Update File

Note. Manual update file is an .exe file. For Windows standard user, they may need a permission by Administrator to execute the files.

1. Check your e-solution current ver.

- (1) Open e-solution software on your PC.
- (2) Click on "Help" from pull down menu and select "About".

For the user with e-solution version 3.8.1, please use the manual update file 3.8.1 to 3.9.0

(3) Close E-solution program.

2. Install the manual update files

(1) Find the manual update file from MHIAE website: <u>https://mhiae.com/e-solution/</u>

3. Check e-solution updated ver.

- (1) Open e-solution
- (2) Click on "Help " \rightarrow "About"

(3) Window below will be shown with version 3.9.0 when the manual update is successful

4. Update folder permission in ver.3.9.0

E-solution software needs to allow the Windows user to full access to the files of the software.

Ver 3.9.0 has a function to give permission to all the user to access the file, because some Windows user are restricted to access the files due to local security setting.

<u>Please make sure to activate "Update folder permission" from the pull down menu, after installation of</u> ver3.9.0

DOS window will be shown and permission to access the file will be updated.
